Software Development Engineer in Test

Experience with front/back-end software development and web, mobile, and API automation testing.
Fast learner, self-driven worker, and a team player with the aptitude to take on new challenges.

Technical Skills

Languages: JavaScript, Java, Kotlin, Python, PHP
Technologies: TestNG, Selenium, React, Express, Angular, Bootstrap, Node, Docker
Database: MySQL, PostgreSQL, MongoDB, Cassandra, Amazon RedShift, Firebase
Software: IntelliJ, Eclipse, Talend, VS Code, Robo 3T, MySQL Workbench, Microsoft Office Suite
Version Control: GitHub, GitLab, BitBucket
Scrum Tools: Jira, Confluence

Work Experience

Virgin Pulse

Software Development Engineer in Test (SDET)   **September 2019 – Present**
- Contribute with converting manual tests to automation tests to allow more time for other tasks
- Write mobile/UI/API automation tests to maintain high quality standards for new features
- Collaborate with development team to write automation tests for testing new application features
- Participate in code reviews by suggesting changes for maintaining consistency with approved design
- Document bugs by creating tickets in Jira in order to fix them before being deployed to production

Software Engineer Intern   **April 2019 – September 2019**
- Worked closely with Scrum and development teams to investigate and resolve production incidents
- Participated in code changes and code reviews for fixing client escalated issues
- Contributed to writing and updating documentation in Confluence to keep up with current technology
- Trained a number of newly hired interns and Associate Software Engineers to understand our platform

Projects

CarSpace   **October 2018 – Present**
- Car enthusiasts may keep track of their vehicle maintenance history and share ideas with other users
- Technologies: MongoDB, Express Server, React, Node, JavaScript, Bootstrap, Firebase
- Test Email/Password: prodtestuser001@carspace.com/123456
- Live App: https://car-space.herokuapp.com/

VangAutoTests   **November 2019 – Present**
- This repository includes automation tests for new features and bug fixes for my projects
- Technologies: Java, TestNG, Selenium
- Code: https://github.com/mVang92/VangAutoTests

Certifications

Full Stack Web Development   **October 2018**
- Trilogy Education Services

Education

Bachelors of Science in Computer Science and Information Systems
- University of Wisconsin – River Falls (AACSB)
