Web Development Group Projects

Crawspace

- Project Description
  - This project is intended to promote safety to young adults by utilizing both Google Maps API and a crime history API to mark danger zones for bar crawling. Users can view danger zones around their proximity and avoid them as they travel to their next location.
- Key Technologies Used
  - Bootstrap, jQuery, Firebase, Google Maps API, Crime API

Boundary Waters Code Camp

- Project Description
  - This full-stack website gives information about the Boundary Waters recreational site for viewers to plan a camping, hiking, or mountain biking trip. Viewers may view trip information and submit reviews of what they thought about their trip.
- Key Technologies Used
  - APIs for trips and weather forecast, sequelize database, MySQL, Handlebars, Express server, Node.js
